CAREER OBJECTIVE

Looking for a job as a full-stack developer. I learned to design and code on my own and want to put these skills to work.

SKILLS

HTML / CSS
JavaScript (ES6, React.js, Next.js, Redux, Node.js)
Typescript
RESTful APIs (Express, Prisma, Mongoose)
SQL (PostgreSQL, MySQL)
NoSQL (firebase, MongoDB)
Cloud (AWS, GCP, Vercel)
CI/CD

EDUCATION

Graduation | Year 2023
Amity University Raipur, Chhattisgarh
CGPA: 8.4

12th | Year 2020
Holy Cross English medium higher secondary school Kawardha, (C.G.)
12th: 85%

EXPERIENCES

Full Stack Developer
Actiohx Pvt. Ltd. — Apr 2024 – Present | Remote

- Collaborated with teams and clients from requirement gathering to **on-time project delivery**
- Developed and maintained secure, efficient, and well-tested applications
- **Optimized performance**, reducing load time from **2 min → 10 sec (~92% faster)**
- **Cut cloud costs** through infrastructure **optimization** and resource management
- Built interactive dashboards, role-based authentication, and client-specific mockups, often delivering ahead of schedule

PROJECTS

Skystay 🔗

MERN stack Booking web application.

- **React** frontend with Tailwind CSS for responsiveness, and Express backend with JWT for secure user authentication.
- Enhanced development skills: implemented Context API in React for efficient state management.
- **Implemented hybrid deployment** separate frontend backend services for scalability.
- Utilized User MVC in Express routing for organized and efficient API creation.

Fox Blog 🔗

MERN stack Blog web application.

- **React, Express, Node.js, and MongoDB** fuel a feature-rich blog app with JWT and **OAuth** (Google) authentication. **Redux Toolkit** for efficient state management within the blog application.
- **Admin Dashboard**: Manage users, posts, and comments with a dedicated admin dashboard for a comprehensive app overview. Utilized MVC framework in Express routing for organized and efficient API creation.
- **Seamless User Experience**: Navigate posts with **pagination**, refine searches, **personalize themes**, and engage with comments (create, edit, delete).

Sayheychat 🔗

MERN stack Chat web application.

- Developed a real-time chat application using React, Chakra UI, Express, Node.js, MongoDB & Socket.io. Enables both **one-on-one** and **group** chat functionalities.
- Leveraged MVC framework in Express routing for organized and maintainable API structure. JWT for authentication and access control
- Utilized Socket.io to facilitate **real-time communication** between users within the chat application.
